Postgraduate Students

Name	Programme	Project Title
Gillian Banks	EPI	Dynamics of feral oilseed rape populations and the impacts on associated insect communities.
Raymond Campbell	QHN	Genetics of carotenoid levels in potato tubers.
Emily Clark	EPI	Multi-trophic factors influencing aphid vector competence in a spatially heterogenous environment.
Katy Clark	EPI	Does Mother know best? Is host plant selection by above ground insects influenced by below ground herbivores.
Emma Coates	QHN	Anti-cancer effects of soft fruit phytochemicals.
Jordi Comadran Trabal	GEN	Mapping adaptation of barley to drought environments (MABDE).
Sean Conner	QHN	Metabolic profiling of potato (<i>Solanum tuberosum</i>).
Suzanne Donn	EPI	Molecular ecology of soil nematode communities.
Martin Elliot	EPI	On modelling GM oilseed rape populations.
Dominique Hardy	PP	Biofilm formation by <i>Pectobacterium atrosepticum</i> on potato tubers.
Gerald Hochshartner	GEN	Application of a novel snoRNA marker system in plant evolution and systematics.
Severine Grouffaud	PP	Translocation of <i>Phytophthora</i> effectors and their manipulation of host plant disease resistance.
Louise Kasproicz	PP	The population dynamics and ecophysiology of the peach-potato aphid <i>Myzus persicae</i> .
Jennifer Kennedy	EPI	AM fungi in agriculture.
Susan McCallum	GEN	Linking phenotype to genotype for fruit quality traits in raspberry.
Sandy MacDonald	GEN	Regulatory pathways involving iron acquisition in <i>Pasteurella multocida</i> A:3, their role in pathogenesis and relevance to disease mechanisms in <i>Pectobacterium atrosepticum</i> .
Tim Miller	PP	Metabolic and proteomic profiling of the interaction between plant hosts and root knot and cyst nematode endophytes.
Carolyn Mitchell	PP	Cane fruit: Novel approaches for ICM in fresh and processed crops.
Lucy Moleleki	PP	Characterization of the interaction between type three secreted proteins in <i>Pectobacterium atrosepticum</i> and its host plant <i>Solanum tuberosum</i> L.
Juan Gonzalo Morales Osorio	PP	Mechanisms of virulence and avirulence in the biotrophic interaction between potato and the late blight pathogen <i>Phytophthora infestans</i> .
Michael Ravensdale	PP	Unravelling the regulatory mechanisms involved in the production of coronafacoyl phytotoxins and other pathogenicity determinants in <i>Pectobacterium atrosepticum</i> .
Christelle Robert	BioSS	Elucidation of the regulatory binding sites in bacterial genomes.
Rosalind Taylor	PP	Ubiquitin-proteasome directed proteomic approach to dissect biotic stress signalling in plants.
Maja Thorsen	EPI	Biological mechanisms involved in stabilizing sandy soils of the Machair.
Stefanie Vink	EPI	Functional soil ecology and conservation in the Machair in relation to changing land management.
Tobias Wojciechowski	EPI	Root development in semi-dwarfing lines of wheat and barley.
Han Xiao	QHN	Function of polyphenols in chemoprevention.
